TITLE : SEAL FOR INHIBITING REWRITE OF
 OPTICAL DISK

ABSTRACT : PROBLEM TO BE SOLVED: To easily and surely inhibit the rewriting of a rewritable optical disk by only a simple and low cost member and to allow the visual and optical recognition of the rewrite inhibiting information.

SOLUTION: The seal 3 inhibiting the rewrite of the optical disk 1 is stuck on the clamp area 2 of the rewritable optical disk 1. The seal 3 is formed into a sectorial shape having almost the same width as that in the radial direction of the clamp area 2, and marks 3a reflecting the light in the quantity different from that for the clamp area 2 are formed in a cross stripes state over the whole upper surface of the seal 3.
